

White steel, now greener

Kingspan | invespanel launches its range of sandwich panels using steel with a guaranteed minimum recycled content and produced sustainably.

- *Invespanel's Higher Recycled Content* steel is manufactured with 100% renewable electricity and contains a minimum of 75% scrap.
- *Invespanel's Higher Recycled Content* is the catalog of sandwich panels manufactured to measure with the following requirements:
 - Steel Color: Pyrenean white 1006
 - Thickness: 0.5 or 0.6 mm
 - Coating: 25 µm PS lacquer
- Available panels: Panel-Lab range
- In order to verify the traceability of the use of this steel, each delivery of panels will be accompanied by a Certificate of production of recycled steel and produced with reduced emissions with the information on the recycled steel contained in your order.
- The Higher Recycled Content panel range is available on request, always check availability.
